## **BOAI NKY Pharmaceuticals Ltd. announces expansion of its Technical Support Labs at In-cosmetics 2016.**

**Tianjin, PR CHINA** (April 6, 2016) - BOAI NKY, the first Polyvinylpyrrolidone (PVP) manufacturer in China and a significant manufacturer of methyl vinyl ether/maleic anhydride copolymers (PVM/MA), announces a major expansion to its Technical Support Labs. These enhanced facilities will provide our customers with outstanding support in helping them optimize their formulations in the Personal Care, Pharmaceutical and Performance Chemical markets for our range of PVP and PVM/MA polymer families.

In addition, these enhanced Technical Support Labs will support BOAI NKY's goal to broaden the application base of its OraRez<sup>®</sup> range of PVM/MA products. These products currently enjoy strengthening positions in the Oral Care market due to their excellent mucosal adhesive properties. To further build the OraRez<sup>®</sup> platform, BOAI NKY continues to develop new applications around their outstanding bioadhesive functionality, with special focus in the areas of skin protection and repair. Customers who are interested in making use of this expanded facility or discussing any of our products should contact Dr. Herb Ulmer as above or visit us at Stand V87, In-Cosmetics, Paris, April 12-14, 2016.

### **ABOUT BOAI NKY.**

BOAI NKY Pharmaceuticals Ltd. (NKY stock code: 300109) was the first PVP manufacturer in China and has been manufacturing PVP's for nearly 30 years. The Company opened a new "state of the art" manufacturing facility in Henan Province, PR China in 2013, making it the production center for our PVP and PVM/MA polymer families.

All pharmaceutical, cosmetic, food and oral care polymers are manufactured under strict cGMP guidelines. With established R&D and Technical Centers, NKY is committed to the development of new products and technologies to bring new solutions and value to our customers.

The Company operates through owned subsidiaries in Asia and Europe and with a network of specialist distributors. We serve customers in more than 60 countries worldwide.
